Leonis is a single downlight with a low installation height. The downlight has an integrated LED and a frame in white plastic which contributes to a long life and low energy consumption. Furthermore, the downlight has opal white diffuser glass, that allows light to spread beautifully throughout the room. It is quick and easy to install Leonis via a screwless plug-in connection and twist-lock system. In addition, the downlight has a flexible cutting diameter (Ø68-73/76mm) and allows for parallel connection.
